Record a Video with Kaltura via Mashups for Students

Kaltura is a powerful video sharing service that works directly in Blackboard via the Mashup feature. This tool allows you to add video content anywhere there is a text editor including Discussion Board Forums and Bb Journals/Blogs/Wikis. You can upload videos, capture your screen/presentations and record from your webcam.

Record with the Mashups tool:
1. Access the Blackboard text editor. The editor appears when you are inputting in a Discussion Board Forum, Blog, Wiki or an assignment.
2. In the text input box, click ‘Mashups’ and select ‘Kaltura Media.’

*Figure 1*

**Note:** If the video has previously been uploaded to the Kaltura Blackboard tool, you can find it the list on the lower part of the window. To upload new content choose the ‘Add Media’ button in the upper right.
Select ‘Add Media’ in the top right corner.

3. Select either ‘Upload media or record from webcam’ or ‘Record your screen.’

4. If you are recording your screen or using your webcam to record yourself, follow our tips for best practices located [here](#) in the IRC.

5. Enter a title, tags if you want, and a description. Inputting tags and descriptions will make it easier for you to find the video in Kaltura ‘My Media’ area in Blackboard.
